

## **Dendrobium Orchids**

**These superb flowering orchids have been grown in Perth and will flower in your home for at least 2 months provided you follow a few golden rules!**

**They are best presented by placing in a decorative glazed pot - our range of German glazed pots is huge and you are sure to find a colour and style to fit perfectly with the interior of your home.**

**Place in a room that has some reasonable natural light and treat as a long lasting bunch of fresh flowers.**

**It is important to water your orchid twice a week by removing from the glazed container you are presenting it in and water over the top of the pot making sure you do not water the flowers or the foliage. This will take less than a minute and that's all there is to it! When this is done, place orchid back into the container.**

**Provided you have adequate light and you water just twice a week, you can enjoy these long flowering plants for at least two months - a lot more inexpensive than buying fresh cut flowers each week!**

**We will have Dendrobiums available most times throughout the year from all our locations.**
